The Judge Of Ages | b9d9ab4e68c418ae43413e35873f18c1

A latest entry in the series set more than 8,000 years in the future continues the efforts of two rivals who would defend the Earth from enslaving alien invaders, including one who tampers with humanity's evolution and another who would reunite with his diplomat bride. Revealing analysis of how judges work as individuals and collectively to uphold judicial values in the face of contemporary challenges. A look at the culture and fanaticism of book lovers, from beloved New York Times illustrator Grant Snider It's no secret, but we are judged by our bookshelves. We learn to read at an early age, and as we grow older we shed our beloved books for new ones. But some of us surround ourselves with books. We collect them, decorate with them, are inspired by them, and treat our books as sacred objects. In this lighthearted collection of one- and two-page comics, writer-artist Grant Snider explores bookishness in all its forms, and the love of writing and reading, building on the beloved literary comics featured on his website, Incidental Comics. With a striking package including a die-cut cover, I Will Judge You By Your Bookshelf is the perfect gift for bookworms of all ages. Rivka Anoa has a gift and a galactic mandate. She's a lawyer accused of a murder she did commit. She stands ready to accept her fate, even though her victim was a murderer. A second chance appears. Become more than a lawyer. Be one who judges and punishes the guilty. Could she look herself in the mirror after meting out justice? She's about to find out. Rivka heads to space to be the Judge, Jury, & Executioner. Criminals have nowhere to go. You Have Been Judged Get it now. Judge, Jury, & Executioner is a stand-alone series in the Kurtherian Gambit Universe. No previous books need to be read. Just lock in your seat-belt, grab your favorite drink and be ready for your socks to be blown off. --- PLEASE NOTE --- *** This book contains cursing. Perhaps humorous cursing, but cursing nevertheless. If this offends you, perhaps this book isn't for you. A judge’s role is to make decisions. This book is about how
judges undertake this task. It is about forces on the judicial role and their consequences, about empirical research from a variety of academic disciplines that observes and verifies how factors can affect how judges judge. On the one hand, judges decide by interpreting and applying the law, but much more affects judicial decision-making: psychological effects, group dynamics, numerical reasoning, biases, court processes, influences from political and other institutions, and technological advancement. All can have a bearing on judicial outcomes. In How Judges Judge: Empirical Insights into Judicial Decision-Making, Brian M. Barry explores how these factors, beyond the law, affect judges in their role. Case examples, judicial rulings, judges’ own self-reflections on their role and accounts from legal history complement this analysis to contextualise the research, make it more accessible and enrich the reader’s understanding and appreciation of judicial decision-making. Offering research-based insights into how judges make the decisions that can impact daily life and societies around the globe, this book will be of interest to practising and training judges, litigation lawyers and those studying law and related disciplines. This book explores justice in the age of artificial intelligence. It argues that current AI tools used in connection with liberty decisions are based on utilitarian frameworks of justice and inconsistent with individual fairness reflected in the US Constitution and Declaration of Independence. It uses AI risk assessment tools and lethal autonomous weapons as examples of how AI influences liberty decisions. The algorithmic design of AI risk assessment tools can and does embed human biases. Designers and users of these AI tools have allowed some degree of compromise to exist between accuracy and individual fairness. Written by a former federal judge who lectures widely and frequently on AI and the justice system, this book is the first comprehensive presentation of the theoretical framework of AI tools in the criminal justice system and lethal autonomous weapons utilized in decision-making. The book then provides a comprehensive explanation as to why, tracing the evolution of the debate regarding racial and other biases embedded in such tools. No other book delves as comprehensively into the theory and practice of AI risk assessment tools.
The year is 10,515 AD. The Hyades Armada, traveling at near lightspeed, will reach Earth in just four
centuries to assess humanity's value as slaves. For the last 8,000 years, two opposing factions have labored to meet the alien threat in very different ways. One of them is Ximen del Azarchel, immortal leader of the mutineers from the starship Hermetic and self-appointed Master of the World, who has allowed his followers to tamper continuously with the evolutionary destiny of Man, creating one bizarre race after another in an apparent search for a species the Hyades will find worthy of conquest. The other is Menelaus Montrose, the posthuman Judge of Ages, whose cryonic Tombs beneath the surface of Earth have preserved survivors from each epoch created by the Hermeticists. Montrose intends to thwart the alien invaders any way he can, and to remain alive long enough to be reunited with his bride Rania, who is on a seventy-millennia journey to confront the Hyades' masters, tens of thousands of light-years away. Now, with the countdown to the Hyades' arrival nearing its end, del Azarchel and Montrose square off for what is to be their final showdown for the fate of Earth, a battle of gunfire and cliometric calculus; powered armor and posthuman intelligence. Judge of Ages is the wildly inventive third volume in a series exploring future history and human evolution from John C. Wright.
